

JLAN Solutions Awarded \$2.7 Million FAA Contract

WASHINGTON, DC — JLAN Solutions LLC, (JLAN), a premier provider of comprehensive training services, received a \$2.7 million contract award for Acquisition Training Services from the United States Federal Aviation Administration (FAA).

Via this award, JLAN and its partners will provide FAA acquisition professionals with customized training solutions to develop and enhance the contracting, program management and critical thinking knowledge and skills required to successfully facilitate large and complex acquisitions.

JLAN's full range of comprehensive training and development solutions will help FAA's Acquisition Workforce develop accurate requirements and associated documentation for complex acquisitions, establish relevant evaluation factors, evaluate offers, and award and administer sophisticated, performance-based contracts.

This contract award helps to meet the goals of the Program Management Improvement Accountability Act (PMIAA) to improve program and project management practices within the Federal Government, as well as the President's Management Agenda of ensuring taxpayer dollars are providing critical Federal services to citizens efficiently and cost-effectively.

As the government makes major changes to the Federal procurement landscape through category management, JLAN's curriculum covers multiple government-wide initiatives that are transforming the Federal acquisition space, as well as best practices for collaboration between the Federal acquisition community and industry.

JLAN's President and CEO Ronnette Meyers shares that, "JLAN is proud to have served the FAA for the last nine years. We are honored to expand our relationship by delivering acquisition training, tools, products and services tailored to Federal acquisition professionals who are responsible for mission-critical spending."

About JLAN Solutions:

Founded in 2010, JLAN is headquartered in the Washington, DC Golden Triangle business district. JLAN partners with government and commercial clients to design and deliver creative, tailored, flexible, value-based and comprehensive training solutions, from conception to execution, to boost our customers' efficiency, productivity, and resiliency. Leveraging deep roots in program/project management and information technology, JLAN's multi-disciplinary team pioneers analytics and best practices that enhance productivity, decrease costs and ensure that organizations reach and sustain their strategic goals.
